

Manual Heat Transfer Machine

The HIX® SwingMan Series heat presses are for the professional who is serious about high quality impressions, maximum production, and safety. They are completely at home when using textile transfers but really excel when sublimating on any substrate, thick or thin, due to absolute vertical pressure and a heat casting that swings out of your way almost 180° while setting up the artwork.

What makes the SwingMan Series stand out from the competition is its ability to apply over 1200 lbs of downward force with very little effort. Our exclusive linkage system provides a mechanical advantage where a small amount of force on the handle produces a much larger force on the substrate.

SwingMan 20

SwingMan Series

Overview

- These presses feature a digital timer that is adjustable up to 99 minutes and 59 seconds, shows a countdown on the readout, beeps after the time has elapsed, resets when the operating handle is raised and has a full range pressure adjustment to work with every project.
- The HIX® SwingMan Series Swing Away Heat Press sets the industry standard in heat press design for sublimation and textile heat transfer production. This will provide incredible advantages to the operator reducing fatigue and increasing productivity.
- The SwingMan 20 is perfect for pressing ceramic tiles, puff transfers, license plates, hot split transfers, glass cutting boards, rhinestones, mouse pads, garments, plaques, and nail heads. This full-sized swing-away press is a must-have for any serious sublimation shop.
- The SwingMan 20 large 16" x 20" platen opens up more opportunities for cut-and-sew manufacturers, signage, and sublimation applications that cover a multitude of substrates. Not only can you press larger items, but the increased size also allows you to press multiple smaller items in one press – perfect for increased production!
- The SwingMan 20 is perfect for applying oversized designs on the full front of a shirt. It will also be able to accomplish jobs such as applying reflective stripping or names to 3XL and 4XL shirts in one pressing.

FEATURES

- Integrated full color LCD touchscreen controller
- Up to four programmable presets
- Heavy duty pressure resistant molded lower platen pad
- Swing away design for easy shirt loading
- Lifetime warranty on heating element

SwingMan 20 Features

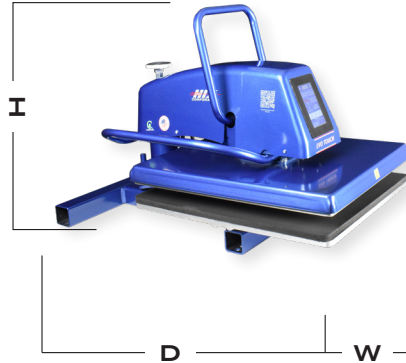

- 16" x 20" Heat Platen
- 120v or 220v

TEMPERATURE RANGE

Off - 450°F (232°C) upper platen

ACCESSORIES (Not Included)

- PTFE Sheet
- PTFE Pad Protector
- SwingMan 20 Splitter Stand
- Replacement Pad Kits
